

## TAMAR LEAGUE 2009 TO 2010

This is the 5th report from the league compiler for this season.

To keep the report to manageable proportions the table below has been compiled from 8 events from September 2009 up to the latest event at the Five Tors double header. Scores have been shown for runners who have attended more than 1 event and for more than 1000 points unless the list is short! The two clubs fixture lists have somehow arranged themselves that KERNO have held 5 events so far to Devon's three. Short Green runners are disadvantaged somewhat as it was thought that there would be only two events at which the course is offered – the two clubs' Galoppen. However Devon ran a short Green course at Five Tors and so we now have three events to count.

Event Planners, Controllers and Organisers (the latter if they have not run) are credited with their average score for their official duties. Several DEVON runners have already completed the minimum number of KERNO events are thus shown in bold – now that DEVON has run three events I'm pleased to see an increase in qualifying competitors.

The number of events entered is also shown along with the average score for all events. To appear in the final tables competitors from one club must complete at least three events from their neighbouring club. While the whole number of events from the two clubs is estimated at 16 it will then be the best 9 scores that count in the final table.
